

Measuring instruments and Automation Solutions with Meyle Engineering

MEYLE

Endress+Hauser 
People for Process Automation

- Worldwide engineering service for system integration
- Level, pressure, flow, temperature, analysis and recording systems and components
- Continuous ultrasonic level measurement with Prosonic
- Pressure measurement with Deltapilot in any liquid and paste and Cerabar in gas, steam and liquids
- Flow measurement with Proline Flow instruments:
 - Promag electromagnetic flow measurement for paper pulp, sludge, fruitmash and paste
 - Prosonic Flow ultrasonic inline flow measurement for chemical and petrochemical industry
 - Prosonic Flow ultrasonic clamp-on flow measurement for water networks, energy supply and all other areas involving homogeneous (solid free) liquids
- Measuring instruments and automation solutions for the industrial process engineering industry
- Process Control, Industrial Automation, System Solutions
- Distributer for marketleading manufacturers, factory trained engineers
- Spare and maintenance parts management
- 35 years market experience, ISO 9001:2000 certified since 1998
